

Sample Batch Acceptance Summary

Intended use: recurring Hebrew speech-data production.

Source status: Synthetic public demonstration. No customer data is included.
Limitations: This sample demonstrates documentation structure only. Project-specific rules, thresholds, and outputs must be agreed separately.

Batch decision

Decision: Conditional acceptance after repair of 12 records.

Status	Count	Percentage
Accepted	462	92.4%
Repair	12	2.4%
Rejected	26	5.2%

Rejection reasons

Reason	Count	Rule
Script mismatch	8	Spoken sentence materially differs from the assigned text
Background speech	6	Another voice is audible
Clipping	5	Audio peaks are truncated
Wrong sample rate	4	File does not match the project format
Missing consent status	3	Required metadata is absent

Acceptance conditions

- Repair all missing metadata before release.

- Replace the wrong-format recordings.
- Exclude rejected recordings from the delivery manifest.
- Update contributor instructions with a pre-recording environment check.
