

Sample Batch QA Report

Intended use: acceptance review for a synthetic Hebrew document dataset.

Source status: Synthetic public demonstration. No customer data is included.
Limitations: This sample demonstrates documentation structure only. Project-specific rules, thresholds, and outputs must be agreed separately.

Executive summary

Submitted
250 assets

Accepted
226 assets (90.4%)

Rejected
16 assets (6.4%)

Repair required
8 assets (3.2%)

Quality controls

Control	Result	Status
Hebrew-language compliance	248/250	Pass with 2 rejections
Metadata completeness	99.2%	Repair 2 records
Duplicate detection	3 exact, 2 near-duplicates	Reject 5
File validity	247/250 valid	Reject 3
PII review	1 unresolved personal identifier	Reject 1; repair 4

Defect distribution

Defect	Count	Severity	Action
Duplicate asset	5	Medium	Remove
Malformed PDF	3	High	Replace

Missing metadata	2	Low	Repair
Incorrect language	2	Medium	Reject
Privacy defect	5	High	Redact or reject

Release decision

The accepted subset can be released after the eight repair items are corrected and the rejected files are excluded. The next batch should add a pre-submission duplicate check and mandatory metadata validation.
